Summarizing the important facts about Yandex

Yandex — strong positions in many markets

Yandex holds leading positions in many markets with a solid trend for long-term and sustainable growth

In addition to the current business portfolio, Yandex continues to launch new products and services based on its own technologies

Yandex — highly diversified business

Yandex has been successfully developing many business models, including advertising, ride-hailing, e-commerce, FoodTech, video and audio streaming, delivery and logistics business, cloud technologies and much more

Diversification allows Yandex to increase its future growth potential and the resilience of its business

Yandex — services for millions of people

Yandex combines a variety of services that millions of people use on a daily basis. Since 2004, the company has launched more than 90 services in different areas

Many of them are combined in the Yandex Plus subscription program (one of the largest loyalty programs in Russia by number of subscribers), providing additional opportunities for users and businesses

Yandex — long-term growth potential

From 2010 to 2020, Yandex's total addressable market has grown more than 60 times. In the future, the company sees significant growth potential for many of its businesses, especially for new areas in which it is now actively investing

Our more mature businesses, such as advertising and ride-hailing, also still offer a solid growth potential

Yandex — strong team and best-in-class technologies

Our proprietary best-in-class technology coupled with a strong talent pool allow Yandex to develop new services, grow rapidly, increase the competitiveness on the key markets and replicate proven and effective business models in various markets and geographies

Yandex's key businesses (advertising and ride-hailing) are among the most efficient and highly profitable in the world in their industries

Yandex — technologies of the future

Yandex is one of the few companies in the world and the only one in Russia that has launched a public robo-taxi service, and Yandex courier-robots are already delivering orders in Russia and abroad

Self-driving technologies provide Yandex an access to a huge potential market as well as an opportunity to build another sizeable business in the long-term
